The Putnam Seminar is a two credit seminar in mathematics problem solving for students with a keen interest in mathematics. It is designed to heighten your ability to solve problems quickly yet thoroughly.

We meet weekly at a time and place to be agreed upon amongst the participants.

There are no formal written assignments: all work is done orally.

The grading range is from A to A+.

This semester the Putnam exam occurs on the first Saturday in December.
We would like to field a team of three.
If you are interested in being on the team, please let me know.
However it is entirely optional whether or not a Putnam seminar member takes this exam.

We will meet each Friday at 1.30pm in 705 Thackeray.

The instructor is:
George Sparling sparling@twistor.org

Please email me to tell me that you are in the class and if you cannot make the organizational meeting, please let me know your schedule and preferred meeting times.
